Profile

I am a Computer Science undergraduate with a strong interest in Software Engineering and Quality Assurance. I have experience developing academic and personal projects using technologies such as Java, React, Playwright, MySQL, and GitHub. Through these projects, I have built a solid foundation in programming, problem-solving, software development practices, and testing concepts. I am eager to gain industry experience, improve my technical skills, and contribute as a motivated Software Engineering Intern..

Skills

- **Programming Languages:** Java, JavaScript, C, C#, R
- **Frontend Technologies:** HTML, CSS, React.js, Tailwind CSS, Bootstrap
- **Backend Technologies:** Spring Boot, REST APIs, .NET
- **Databases:** MySQL
- **Developer Tools:** VS Code, IntelliJ IDEA, GitHub, Postman, Jira, Vercel, Docker
- **Testing Tools:** Playwright, K6
- **Core Skills:** Problem Solving, Logical Thinking, Debugging, Testing

Academic Projects

- **Chloride Diffusion Analyzer (Web Application)**  |  Dec 2025 – Jan 2026
 - Extended a Python-based engineering application into a modern web-based solution.
 - Implemented numerical computation logic and interactive graphical visualizations for chloride diffusion analysis.
 - Deployed the application online to improve accessibility for academic and research purposes.
- **TestLang++ (Domain-Specific Language for API Testing)**  Dec 2025 – Present
 - Designed a custom domain-specific language (DSL) to simplify backend API testing workflows.
 - Implemented lexical analysis and parsing techniques to validate test scripts.
 - Improved automation and readability of API testing processes.
- **Employee Management System – Backend API**  Jan 2026 – Feb 2026
 - Designed and developed a backend system to manage employee records, roles, and organizational data.

- Implemented CRUD operations with database integration using RESTful APIs.
- Improved efficiency in employee data management through a centralized platform.

- **Hotel Management System – Web Application** Aug 2025 – Nov 2025

 Frontend | Backend

- Collaborated in a team of four to develop a full-stack hotel management system for a university project.
- Developed backend RESTful services using Java and Spring Boot
- Built a dynamic frontend components using React.
- Followed Agile methodologies using Jira for sprint planning, task tracking, and issue management.
- Worked collaboratively to design system architecture, develop modules, and integrate application features.

- **Fault-Tolerant-Distributed-Messaging-System** Aug 2025 – Nov 2025

- Developed features to improve system reliability during component failures.
- Identified potential failure scenarios and implemented recovery mechanisms.
- Enhanced overall system stability through effective error handling and fault-tolerant design.

Education

BSc (Hons) in Computer Science Oct 2023 – Present
Sri Lanka Institute of Information Technology (SLIIT)

Languages

- English
- Tamil (Native)

Certifications

- Introduction to C# – SoloLearn
- Introduction to Java – SoloLearn
- Java Intermediate – SoloLearn
